BIDDING OPENS ON MARCH 27 • BIDDING CLOSES @ 1 P.M. ON MARCH 29, 2025 SALE CATALOG, VIDEOS & BIDDING AVAILABLE AT WWW.BILLPELTON.COM

- From the Heart of Big Sky Country Danell Diamond Six Ranch Gelbyieh

30th Annual Production (Sale

Thirty years later and the weather forced us to change our sale date! Although it has always been the third Saturday in March, the auction will close March 29 this year! We had so much snow and such bitter cold temperatures that we were unable to get pictures, videos, fertility testing, or ultrasound in time to put a catalog together for our

Again, we are doing the online only auction with www.billpelton.com. Give us a call if you have any questions usual sale date. We hope this has not caused an inconvenience for any of you. about any of the bulls, or the auction process. Also, you can always count on Bill Pelton's daughter, Darci Sachdeva, to talk you through the technical part of getting online and bidding. She is professional, very personable, and easy to reach on the phone at (406)794-3174. The auction will open Thursday, March 27 and close at 1:00 pm on Saturday, the 29th of March. The auction actually closes on all the bulls 5 minutes after the last bid on any bull.

We plan to have an open house here at the ranch to view the bulls starting at 4:00 Friday afternoon on the 28th. They are also here for viewing anytime from now until then if you just give us a call to let us know you would like to take a look. As always, you are protected by our "sight unseen" guarantee of satisfaction if you choose to buy, but

Of course, we always strive to improve our offering from year to year and I feel this set of young bulls lives up to have been unable to get here to view them. Please give me a call with any questions. the excellence you have come to expect from us! We have dedicated our breeding program to help our customers ... and ourselves to raise calves that will put pounds on, replacements in the heifer pen, and animals that will grade

Dr. Greg Carlson, DVM does our foot scoring and does a serious evaluation and he is happy to explain the prochoice and bring your buyers back looking for your calves in following years. cess if interested. A perfect foot score is 5 for heel height and 5 for claw structure (5/5) and we are happy to report that we have a few of those as well as some near perfect scores! We also vaccinate the bulls with Fusogard (foot rot prevention) and Bovi-Shield GOLD FP 5 VL5 and pour them at the time of fertility testing, which was 2/26/2025. We are also willing to pay for ½ of the insurance cost to insure every bull sold this year. We have always guar-

anteed our bulls through the first breeding season, but we feel that this offer of paying for ½ of the insurance is a better deal for you and us as the insurance covers the first full year. Insurance starts at 11% of the purchase price

- I would pay $5\frac{1}{2}\%$.

Please join us for a PRE-SALE GATHERING at the Danell Diamond Six Ranch on Friday, March 28th starting at 4 p.M. This is a great chance to check out the bulls and a good excuse to get our friends and neighbors together for a visit!

DNA TESTING: All homozygous black and homozygous polled bulls are guaranteed by birth right or by DNA testing.

SEMEN TEST and HEALTH INFO: Full Breeding Soundness Exams have been performed. Scrotal measurements and foot scores are listed with the performance data on each bull. Bulls were tested and examined by Dr. Greg Carlson, Horizon Veterinary Clinic of Lewistown. Bulls have also been BVD tested and vaccinated with Bovi-Shield GOLD FP VL5.

HOMOZYGOUS Polled, HOMOZYGOUS Black 75% Gelbvieh Balancer (heifer/cow) bull with a 73# birthweight (91 BW Ratio, 96 WW Ratio, 96 YW Ratio), a Tenderness score of 6, and a per-

fect 5/5 (heel height/claw structure) foot score! DAM: JOB DANELL Patty 21K ET is a first calf heifer that was 79# at birth and had a 99 WW Ratio, 98 YW Ratio, 103 Ribeye Ratio, and 103 Marbling Ratio (5.049 IMF)! Her Donor Dam, JOB DANELL Sally 23Y, is a Purebred Gelbvieh Dam of Distinction and has a great set of performance ratios - 92 BW Ratio (78# avg on 10 calves), 104 WW Ratio on 10 calves, 103 YW Ratio on 8 calves, 109 Ribeye Ratio on 8 calves, and 87 IMF Ratio on 8 calves (that is an avg 3.63 IMF on those 8 calves - extremely impressive for a Purebred Gelbvieh Cow)! Sally is also the granddam of JOB DANELL Paygrade 68E the sire of JOB DANELL Pay Pal 12H!

SIRE: JOB DANELL Top Shelf 38K ET is an AI Sire that roams the pastures of Dennis Gustin's Diamond D Gelbvieh of Mandan, ND. Top Shelf is a growth bull with exceptional carcass EPDs he scanned a 13.92 ribeye and a 4.29 IMF and had a 39.7 yearling scrotal!

TOP PICK has a fine set of EPDs - Top 15% for BW, Top 30% for CEM, Top 2% for PG30, Top 5% for Stayability, Top 20% for Scrotal & YG, and Top 30% for Ribeye! The fact that he is 75% Gelbvieh lets you make great Purebreds and Balancers!

HOMOZYGOUS Polled, HOMOZYGOUS Black (and solid black) 67.2% Gelbvieh Balancer son of JOB DANELL Pay Pal 12H from a first calf heifer and he has an 88# birthweight (109 BW Ratio, 102 WW Ratio, 104 YW Ratio), a Tenderness score of 9, and a near perfect 5.5/5.5 (heel height/claw structure) foot score!

DAM: JOB DANELL Quiche 02K boasts some great EPDs across the board - Top 20% CED & WW, Top 10% YW & HP, Top 15% CEM, Top 2% Docility, Top 3% CW, Top 10% Marbling, and Top 5% FPI!

SIRE: JOB DANELL Pay Pal 12H has become one of the breed's most influential sires, producing progeny that absolutely GROW and carry his exceptional growth and carcass EPDs - Top 5% WW, YW, & PG30, Top 3% Milk, Top 2% TM, Top 10% HP & Scrotal, Top 4% CW, Top 20% Ribeye & FPI, Top 50% Marbling, and Top 35% EPI!

QUICKEN is a cow bull that has a 736# 205 weight (102 ratio) and a 1331# 365 weight (104 ratio)! This growth bull ranks Top 3% for WW, Top 4% for YW & TM, Top 25% for Milk, Top 5% for HP, Top 20% for PG30 & Scrotal, TOP 15% for Docility & YG, Top 2% for CW, Top 3% for Ribeye, and Top 20% for FPI! He is extremely long-made, good-footed, cleansheathed, straight-backed, and travels well! If you don't own a Pay Pal son yet, this is one cow bull you should consider to put females in your replacement pen and steers that will weigh up!

DAM: JOB DANELL Heidi 08H, mentioned in the description of Lot 3, is a young mama that just keeps bringing in the great ones – and Groot is no exception! She boasts a 101 BW Ratio on 3 calves, 102 WW Ratio on 3 calves, 106 YW Ratio on 2, 102 Ribeye Ratio on 2, and 95 Marbling Ratio on 2! SIRE: JKGF All American J109 is a new AI sire to

SIRE: JKGF All Ámerican J109 is a new AI sire to our program and I believe you will like his sons that we are offering in this sale. We retained all three of the bull calves we produced from this sire, which is quite an accomplishment in any program!

GROOT is quite the calf - big hipped, wide topped, big spring of rib, long made, and very eye appealing! His set of EPDs is amazing - Top 10% for WW, Top 3% for YW & HP, Top 30% for TM, Docility, & Scrotal, Top 20% for PG30, Top 25% for CW, and Top 15% for Ribeye & FPI! DNA testing has shown Groot's color testing to be EDE+ which is defined as "Typically Black Hided, Wild Type" meaning - dominantly black, wild type carrier - his calves will typically be black with some being homozygous black and some being black with the wild type color gene. He does have a small amount of white near his navel. Groot will put good replacement females in your program and steer calves to add to your profits. What a beef machine - if he didn't have white on his sheath, I think this bull would be going into a Purebred herd!

DAM: JÓB DANELL Mandarin 55G is a favorite for many reasons — a calm disposition, a perfect udder, a moderate frame, and good feet, and always brings in a good one, and is a Dam of Merit! This 6-year-old dam has a 92 BW Ratio on 4 calves, 100 WW Ratio on 4 calves, 102 YW Ratio on 2, 102 Ribeye Ratio on 2, and 91 Marbling Ratio on 2! Unfortunately, her 1st calf – JOB DANELL Clementine 07J – was not ratioed for yearling or ultrasound because our heifers were being fed a long way from home. Clementine happens to be the dam of JOB DANELL Forty Niner 62M – Lot 15 in this sale – a real eye opener and probably one of the best young females we own!

SIRE: BARG Go Time 781J is a Gelbvieh Balancer Bull Futurity winner at the National Gelbvieh Convention – voted on by members of the Futurity! I have not used many of the winners, but Go Time had good EPDs for CED, CEM, Milk, WW, YW, HP, PG30, SC, and carcass traits and the style that made me want to use him! We have been pleased with calves from these matings, most of the females being retained in the herd and the bull calves performing well and doing well in the sale!

doing well in the sale!

KONG is a larger framed, long-made, sound-footed, cow
bull with good EPDs – Top 35% for WW, Top 25% for Milk

RTM, Top 15% for HP, Top 5% for PG30, Top 3% for Stayability, Top 10% for Scrotal, Top 40% for CW & FPI, and Top
35% for Marbling! Kong offers fertility, growth, milk, udder
improvement, and comes with a Tenderness score of 8 and
an ultrasound Ribeye measurement of 15.16 (104 ratio)! He
is a cow bull that will put replacement heifers in your pen
with maternal and carcass value you cannot find just anywhere while adding extra length and weight to your calves!

DAM: JOB DANELL Ashley 33H is a 5-year-old dam that is another rising that in our program. She

DAM: JOB DANELL Ashley 33H is a 5-year-old dam that is another rising star in our program. She raised a Purebred that sold for \$6500 in our last year's bull sale and I expect this calf to top that! She has a 96 BW Ratio on 3 calves, 101 WW Ratio on 3 calves, 104 YW Ratio on 2 (103 Ribeye Ratio on 2! We liked MAGA so much as a calf that Ashley is bred back to All American to calve this year!

SIRE: JKGF All American J109 is also the sire of Lots 3, 5, and 6 and, as you can see, he has put some of the best bulls in this sale and his heif-ers are exciting as well! His offspring have great eye appeal and excellent feet – a breed improving bloodline that you would do well to add into your program!

MAGA is a beef machine! His EPDs are second to

MAGA is a beef machine! His EPDs are second to none – Top 40% for BW & Scrotal, Top 10% for WW, YW, HP, & PG30, Top 30% TM, Top 3% for YG, Top 10% for CW & FPI, Top 1% for Ribeye, and Top 35% for Marbling & EPI! Wow!! Showing a great spread from birthweight to growth, with breed-back EPDs in the Top 10% and carcass traits that are impeccable! To top it off – ultrasound measurements of 15.26 Ribeye (106 ratio) and 2.935 IMF with a minimal 84 Fat Thickness ratio! This bull is long-made on a 6 to 6.5 frame, easy-moving with a huge hip, wide top, good spring of rib, big scrotal, great foot structure, and a great disposition!

or 10, and a 6/6 foot score!

DAM: JOB DANELL Danielle 67E is a beautiful 8-year-old female with a BW Ratio of 95 on 5 calves, WW Ratio 98 on 5 calves, YW Ratio 101 on 3 calves, Ribeye Ratio 104 on 3 calves, IMF Ratio 109 on 3, and her DNA scores a 10 for Tenderness! Danielle's EPDs are - Top 4% for CED, Top 10% for BW, Top 3% for CEM, Top 30% for HP, Top 25% for PG30, Top 10% for Marbling, and Top 30% for FPI!

SIRE: JOB DANELL Kickstart 65K is an exciting new AI Sire we used heavily and we are happy with the results! Kickstart is a good-footed easy calver with great CE, BW, CEM, and a set of carcass EPDs that are second to none and those carcass traits carry on to his calves! Kickstart is also a 9 for Tenderness!

HARLEY is a great example of carrying on Kickstart's carcass traits and has a strong set of EPDs with great CED, CEM, and BW with good Milk and a very strong set of carcass EPDs that are backed up by ultrasound measurements of 15.36 Ribeye (105 ratio) and 4.030 IMF (131 ratio)! These carcass traits are a large part of the reasons we used Kickstart in our program along with his style and calving ease!

HOMOZYGOUS Polled, HOMOZYGOUS Black (and solid black) 12.5% Gelbvieh cow bull with à 94# birthweight, a 745# 205-weight (104 ratio), and a 1331# 365-weight (104 ratio), a Tenderness score of 5, and a 5.5/6 foot score!

DAM: JOB DANELL Lulu 210F is sired by Plattemere Weigh Up K360, a Purebred Angus AI Sire. She is a female that has given us 4 of 5 calves from AI breeding, calving consistently between the 15th and 21st of February - and she measured a 4.7 IMF (145 Ratio)!

SIRE: BIGK/WSC Iron Horse 025F is a Purebred Angus AI Sire used because of his calving ease, high growth, and docility and he has EPDs for WW, YW, TM, CEM, CW, & FPI in the Top 1% and Marbling in the TOP 3%!

BULLET TRAIN also has admirable EPDs - Top 1% for WW & YW, Top 2% for TM & CW, Top 10% for Marbling, Top 1% for FPI with ultrasound measurements of 14.51 Ribeye (99 ratio), 3.538 IMF (115 ratio), and minimal 0.17 FT (70 ratio) backing up those EPDs! If you are looking for a long-made, high percentage (88%) outcross Angus bull that will add carcass & growth, Bullet Train is the cow bull you are looking for!

DAM: JOB DANELL Clementine 07J is a future star for our program! She is sired by Tehama Pa-triarch F028, the producer of some of the best replacement females we have ever produced from any of the many Angus sires we have used through the years! Clementine is a fine example she is good footed, beautifully uddered, and has a calm disposition! She has a 94 BW Ratio on 2 calves, 108 WW Ratio on 2 calves, 108 YW Ratio on 2, 115 Ribeye Ratio on 2, and 114 Marbling Ratio on 2! We offered our bred heifers for sale this past fall and Clementine's first calf, JOB DANELL Cleo 08L, topped that sale at \$6100! Clementine is definitely earning her way toward our

Donor program!

SIRE: JOB DANELL Kickstart 65K, who now resides at Robinson Gelbvieh in Kentucky, is a bull we used with great enthusiasm in our program - and we are happy we did! Many of the bred heifers we sold in our fall sale were bred to Kickstart and we expect those buyers to report very good results this spring as we did with the Kickstart-bred heifers we calved here! Kickstart semen is available for sale at Bull Barn Genetics. He has great calving ease, moderate growth, and extremely good carcass data with a 9 for Tenderness and his performance supports his growth and carcass traits!

Homo Polled
Homo Black
Balancer®29

and carcass traits!
FORTY NINER's own bragging rights include Top 25% for CED, Top 15% for BW, Top 30% for YW, Top 20% for Milk, Top 35% for TM, Top 10% for CEM, Top 50% or PG30, Top 30% for YG & CW, Top 10% for Ribeye & FPI, and Top 3% for Marbling! In fact – 16 of the 18 EPD stats reported are Top 50% or better – an unusual balance across the board! Let's top that off with a 75# birthweight (92 ratio), a 777# 205-weight (108 ratio), and a whopping 1385# 365-weight (108 ratio), a Tenderness score of 10, and ultrasound measurements of 16.94 Ribeye (116 ratio) and 2756 IMF (138 ratio)! He is smooth-made moderate-framed straight-backed hig hipped 4.256 IMF (138 ratio)! He is smooth-made, moderate-framed, straight- backed, big hipped, wide topped, good footed, clean sheathed, and has a smooth tail head and good neck extension and his dam & granddam both have beautiful udders and his granddam is a Dam of Merit that is still in production! Forty Niner is a bull that will work anywhere – heifers & cows, registered & commercial, and in my herd! He has outcross genetics and a promising future! Forty Niner is truly a bull that puts it all together - we will collect semen from this bull for in-herd use before he leaves the ranch (if he leaves the ranch)!

Family & Triends....
The ones who make everything better!

-Notes-

-AGA EPDS-

MATERNAL TRAITS

Calving ease direct (CED): Percent of unassisted births of a bull's calves when he is used on heifers. A higher number is favorable, meaning better calving ease. This EPD can be vital to a rancher looking to decrease the amount of calves pulled .

Milk (Milk): The genetic ability of a sire's daughters to produce milk expressed in pounds of weaning weight.

Calving ease maternal (CEM): Represented as percent of unassisted births in a sire's first-calving daughters. A higher number represents more favorable calving ease. This EPD is important to a rancher's bottom line because it predicts which animals produce daughters with a genetic pre-disposition to calve unassisted as heifers.

Heifer pregnancy (HP): Predicts the probability that a bull's daughters will become pregnant as first-calf heifers in a regular breeding season, expressed as a percent. A higher value of this EPD is favorable, meaning that a higher percentage of a sire's daughters get pregnant as first calf heifers compared to other sires in his contemporary group.

30-month pregnancy (Pg30): Predicts the probability that a bull's daughters will become pregnant and calve at three years of age, given that they calved as first-calf heifers. This EPD is expressed as a percent, again, with a higher number being more favorable meaning a higher percentage of a sire's daughters will calve at three years of age, given they calved as first-calf heifers.

Stayability (STAY): Predicts the genetic difference, in terms of percent probability, that a bull's daughters will stay productive within a herd to at least six year of age. The stayability EPD is one of the best measures currently available to compare a bull's ability to produce females with reproductive longevity.

Docility (DOC): Is reported as a percentage, with higher numbers indicating a higher percent of offspring receiving a disposition score of 1 (docile).

Scrotal circumference (SC): Predicts the difference, in centimeters, of scrotal circumference of an animal's male offspring at yearling compared to the SC of other animals' male offspring.

GROWTH TRAITS

Birth weight (BW): Predicts the difference, in pounds, for birth weight of the calf.

Weaning weight (WW): Predicts the difference, in pounds, for weaning weight (adjusted to age of dam and 205 days). An indicator of growth from birth to weaning.

Yearling weight (YW): Predicts the expected difference, in pounds, for yearling weight (adjusted to 365 days). This is an indicator of growth from birth to yearling.

CARCASS TRAITS

Yield grade (YG): Differences in yield grade score, which is a predictor of percent retail product. Smaller values suggest that progeny will have a better lean to fat ratio.

Carcass weight (CW): Differences in pounds of hot carcass weight, adjusted to an industry standard age endpoint.

Ribeye area (CREA): Differences in ribeye area in inches between the 12th and 13th rib. Greater ribeye areas are preferable.

Marbling (MARB): Predicts the differences in the degree of marbling within the ribeye as expressed in marbling score units. Greater marbling numbers are preferable and are an indicator of higher carcass quality grades.

Fat (CFAT): Differences for fat thickness, in inches, for a carcass over the 12th rib, smaller numbers of fat thickness are preferable as excess fat can be detrimental to yield grade.

EFFICIENCY TRAITS

Dry matter intake (DMI): Represents the average daily dry matter intake per day consumed in pounds. A negative, or lesser value, is more favorable.

INDEXES

Total maternal (TM): An index that combines growth and milk information as a prediction of the weaning weight performance of calves from a sire's daughters. A greater TM value means a mother that returns comparatively higher weaning weights on her calves. TM Index = MK EPD + $\frac{1}{2}$ WW EPD.

\$Cow: Represents the genetic value in dollars of profit of an animal when retained as a replacement female relative to other animals in the herd. A higher number represents more profitable genetics for maternal productivity. \$Cow will serve producers in selecting bulls that will sire daughters with stayability and reproductive efficiency as well as other traits that lead to profitability in a production system, such as milk, calving ease, moderate mature weight and the ability of calves to gain. A female's genetics also influence the performance of her calves in the feedlot and at slaughter, so traits such as feed efficiency and carcass value are also included in \$Cow.

Efficiency profit index (EPI): An economic selection index developed to aid producers in selecting for more feed efficient cattle that still have acceptable amounts of gain. The EPI provides slight negative pressure on intake, while keeping gain at a constant value. By selecting on this index, producers will be able to find those animals that gain the same amount as their contemporaries while eating less.

FPI™ which stands for feeder profit index: An economic selection index designed to aid producers in selecting sires whose progeny will perform in the feedlot and are sold on a grade and yield standpoint. Well ranking sires for FPI have higher marbling and carcass weight than their contemporaries. As a terminal index, little emphasis is put on maternal traits such as stayability and calving ease.
