*Blessed to have stewarded His
Red Angus cattle for the past 40 years!*

Welcome

We at Milk Creek Reds invite you to view our offering for the 2025 Bull Sale. Our hope is that as you view the information in this catalog that you will be able to see differences within the offering but also that there is consistency throughout the offering.

Tena reminded us that it has been 40 years since we purchased our first registered Red Angus females. It is hard to believe that we have been in this business for that many decades. We have seen many changes in the cattle, the industry and our business over these years. One of the many things that we have discovered is that even with all these changes we still have not figured out how to breed the perfect cow or bull. This can be disappointing and challenging at the same time. In the end, there really isn't a perfect animal that we can breed because as a breeder we are very critical in evaluating cattle and thus we will always find that something could be better. Instead, our philosophy has been to breed cattle that are very functional, adaptable, and profitable to our operation as well as our customers operations that have the same business philosophies.

This year's offering was selected from over 200 herd mates which has allowed these bulls to be consistent in type and kind with a variety of different pedigrees represented. Amongst the tried and true reference sires that we have utilized in the past are a few new A.I. and clean up sires, whose offspring will be the first offered from our program. The progeny from all the reference sires have a common denominator, which is to produce functional, profitable females that will generate as much production within their environment with as few as inputs possible.

Eastern Montana experienced another drought and that meant the bulls weaned off a little lighter than we would have hoped but when they were able to get some nutrition in front of them they exhibited good compensatory gain. The bulls are being fed by Eric and Andrea Bowman and family at Rhame, North Dakota. The Bowmans have been feeding our bulls for 30 + years and have developed this set of bulls to gain around 2.5 pounds per day but with the nice winter they have been doing a little better. While being developed with longevity in mind, the bulls are still fed in a way that allows them to express their gain potential.

This year could be a pivotal year for our breed when it comes to marketing commercial feeder calves sired by Red Angus bulls. Our breed association has been making inroads with feeders and packers to open up more opportunity for red cattle to be priced based on genetic merit not hide color. New packing plants are being opened and more feeders are educated on the quality of Red Angus feeder cattle with hopes of improving pricing on a more competitive level with black hided cattle. Change usually takes time and in this industry sometimes it doesn't move as fast as we would like.

The bulls will sell in catalog order. We begin the sale with a pen of high indexing moderate birth weight bulls and follow with a group of high indexing, low birth weight heifer bulls. After these first two pens we arrange the remaining pens by sire groups allowing for good bulls to be cataloged from the beginning to the end. Some pens will have a mix of one or more sires if there isn't enough progeny from a sire group to fill a pen. We hope that as you view the bulls live, via video or within these pages you will find consistency in type and kind throughout.

Additional information such as scrotal measurements, and frame scores will be posted on our website as well as DV auction as they become available. If we can provide any additional information that will aide you in your selection of genetics do not hesitate to give us a call. Our goal is to provide you with the tools needed to make the best selection possible. We look forward to visiting with each of you and seeing those that can make it to the sale.

May the Lord Bless you,
Bruce, Tena, and Jaclyn Ketchum
Jeff, Cele, Blaze, and Ember Menees

**Bruce, Tena & Jaclyn Ketchum

**Jeff, Cele,
Blaze and Ember Menees**

As servants of the Lord, we are striving to be stewards of the land and cattle that He created and allowed us to manage so that we may glorify Him.

Sale Information

Milk Creek Reds Bull Sale Saturday, March 15, 2025

1 p.m. MDT • Milk Creek Reds Ranch • Plevna, MT

Selling:

108 Yearling Red Angus Bulls

SALE DAY LUNCH:

Complimentary lunch and pie will be served at 11:30 a.m.

SALE LOCATION:

At the Ranch (see map on page 2 for directions)
2093 Plevna Road South, Plevna, Mont. 406-778-3819

CATTLE VIEWING:

The bulls can be viewed at Bruce and Eric Bowman's feedlot 1 mile south of Rhame, N.D., until March 12th. After this time the bulls will be at the ranch.

SUPPLEMENTAL SHEET

Supplemental sheet with updated carcass EPDs, scrotal measurements and frame scores will be available online a few days before the sale and on sale day.

SALE VIDEO

The video of the sale cattle will be available to view by March 1, 2025 at www.milkcreekreds.com or www.dvauction.com. If you don't have high speed internet or are unable to view the video over the internet, contact us for a DVD on the sale cattle.

SALE FORMAT:

Once again we will be offering the bulls through a rancher's auction. We will have an auctioneer that will auction the sale in a relaxed atmosphere. Each interested buyer will be able to bid on the bull of their choice with low pressure and the ability to be comfortable.

Online bidding will take place on DVAuction. Go to www.dvauction.com.

PHONE ORDERS

Buyers unable to attend the sale may call or send their bids to the owners, Bruce or Tena Ketchum. If you would like to discuss the sale offering, call us and describe your needs and budget and we can select your genetics for you. We can bid on the animal for you and you pay only the bid price established by the auction. Bids are handled in confidence on all orders. If there are several people needing to use this method for the sale we will set up a conference call for you to call into during the sale. Please call a few days in advance if this is needed so that we may set this up and get you the necessary phone number and information ahead of sale time.

LIABILITY

All persons who attend the sale or view the cattle do so at their own risk. The owners assume no liability, legal or otherwise, for any accidents that occur on the sale or viewing premises.

ACCOMODATIONS:

Baker, Mont.
(If planning to stay please reserve early as the oil field activity can cause room shortages.)
Montana Motel406-778-3315
Red River Inn406-778-3321
Miles City, Mont.
Sleep Inn & Suites.....406-232-3000
Miles City Inn & Suites.....866-599-6674

TERMS

The terms of the sale are cash. All settlements will be made with clerks of the sale immediately following the conclusion of the sale and before any cattle will be released. We will follow the Terms and Conditions set forth by the Red Angus Association of America. Announcements made by seller on sale day take precedence over any statements printed in this catalog or advertisement.

DELIVERY

We will provide delivery up to 500 miles. Over 500 miles we will work with the buyer to make arrangements on delivery. **A \$100 credit per bull will be applied to the purchase price of the bull if the new owner picks up the bull(s) on the day of the sale.** Delivery of the bulls will start the week after the sale.

BULL HEALTH PROGRAM

The bulls received Vision 7 at branding, preconditioned in August with Bovishield Gold One Shot and Vision 7 Somnus. The bulls were boosted with Bovishield Gold in September. They received a Fusogard injection in December and a booster in January. Bulls were given a shot of Valcor in November, poured with Clean-Up II in December, poured with Inhibidor in January and Clean-Up II in February. Semen evaluations were performed by Fallon County Vet Service prior to the sale and all the evaluation forms will be available sale day. Bulls that do not pass the semen evaluation will be available for sale after they have a satisfactory evaluation.

BULL DEVELOPMENT

The bulls are fed on a ration to develop them into sound functional useable bulls that will work in every environment. The ration consists of rolled corn (6.25 lbs. average), corn silage 14 lbs., dry distiller's (3.0 lbs.), and the balance of chopped hay that consists of ground grass, alfalfa, and barley hay, along with a vitamin/mineral supplement. This ration is developed to use 1% of the feed base being grain to reach our goal of 2.5 lbs. gain. They have been developed at Eric and Andrea Bowman's feedlot which is located 1 mile south of Rhame, ND.

SEMEN INTEREST

Milk Creek Reds is retaining one-half revenue-sharing semen interest in all bulls in the sale. The retained semen interest by Milk Creek Reds allows us to collect semen, use semen on the bull in our herd, as well as share in semen revenue if the bull would develop interest to be used in other herds or semen marketing companies. Any semen collection would be at the buyer's convenience in the off-season use. Full possession and full salvage value sells on all bulls in this sale.

Sale Information

WATCH AND BID ONLINE AT DVAUCTION.COM

Can't make the sale?

We are pleased to bring you real-time Internet bidding and a live broadcast of this sale through DV Auction. To watch or bid online, simply complete the following steps:

- Visit the DVAuction web site at www.dvauction.com
- Click on the "Register" tab
- Enter a user name, password and your contact information.
- Click on "Apply for Bidding."
- Select the sale from the list of other auctions and click "Apply".
- Complete the process by filling out the Banking & Lending information requested.

Be sure to include a personal contact at your bank, we will contact them in order to get a credit reference.

If you would prefer to be approved using your credit card, call (402) 474-5557.

Please be sure to apply for bidding at least a day in advance of the sale—every effort will be made to process your application in a timely manner.

DVAuction will contact you once you have been approved to bid. We do not provide buyer numbers until you have purchased a lot in the sale, and that number is only usable for that auction. After the sale contact the sale owner or manager to make arrangements for payment and delivery of your online purchases.

Please Note: High speed Internet access (DSL, T-1, or Broadband) is required to be able to bid successfully during the sale. If you have any questions, please contact DVAuction at (402) 474-5557 or email support@dvauction.com.

Proxy Bidding: If you can't access a computer during the sale, you can now place a "proxy bid" through DVAuction. Simply follow the instructions listed above, and as the sale date nears there will be a "Proxy Bidding" link under the sale listing on the main page of DVAuction. You can then place the maximum amount that you'd like to bid, and our system will represent your bid just as if you were there.

Scan this code with your smart phone for directions to the ranch.

Reference Sires

RIDGE ADMIRAL 3411

the oldest females are now 10 years old and bringing in good calves while functioning very well in our environment. You will see some of his daughters bringing bulls to this offering. This will be the last large group of natural born sons that we will be offering. We are down to a limited supply of semen and will be using Admiral selectively on certain cows and in our ET program. While this bull does well on all the indicies, when you study the numbers, his growth EPDs that are not what some people would say are ideal, yet it is where we like them to be for the female to fit our environment. Owned with Sandbur Ridge Red Angus.

MLK CRK FUSION 5202

received by their customers. After calving four sets of heifers that were bred to him, we have been pleased with the calving ease, but the nugget in these genetics are going to be the females that he produces. He has numbers that are very attractive to the industry, minus his growth EPDs. His growth numbers; however, will allow his daughters to thrive on less inputs which equates to a better profit margin for the cow/calf producer. Owned with Leland Red Angus.

bull calves in the fall as well as at their 2019 bull sale, and studying the cows both in the spring and fall, we selected Money Talks. We used Money Talks (530F) on both heifers and cows AI and then turned him in with 50 plus head of first calf heifers for natural service and had only three opens. He has now recorded 341 progeny in five calving seasons and we are very pleased in the balance of birth, performance, carcass and phenotype. We are calving his fourth set of daughters and they are displaying excellent udders and feet while being good mothers.

This is our first larger group of offspring out of the 5L Bodybuilder sire. We have seen many daughters in production and really like their fleshing ability, body shape, and nice tight udders. We feel that 5L appropriately named the bull for the depth of body and thickness he produces.

Our ET program has produced another sire that we are using to perpetuate good genetics out of proven cows. As a yearling, 2412 was ran in a large group of heifer calf pairs with Money Talks. Out of 107 pairs, we had five opens in the group but the DNA only provided us with two progeny out of this good young bull. Money Talks didn't let the competition work his pasture at all.

Behind the Scenes Picturing Bulls

Yearling Bulls

Lot 1 • MLK CRK WRANGLER 4221

varies posting 105 weaning and 106 yearling ratios. Our Dominor daughters have been consistent producers with very good feet and udders which has allowed them to reach 7-10 years of age without missing a beat.

If you are looking for a powerhouse bull with a lot of muscle and dimension you might want to look at 4250. This Body Builder son packs as much muscle into his moderate frame and is the thickest and deepest bull in the offering. Lot 8 is backed by an Impact x Admiral 6-year-old daughter that has earned a 104 MPPA on her progeny.

Wrangler is a sire that allows flexibility to produce calving ease in heifers and performance on cows that will compete with many other sires. Lot 16 did what his sire is known for moderate birth and above average performance. 4277's dam combines Copenhagen with an Admiral daughter out of our top Express donor. The combination of these genetics with performance should make an ideal heifer bull that you will want to keep replacements out of.

Long and smooth shouldered, with enough thickness and an attractive look best describes 4290. His sire has been used both in cows and heifers and as a coming 6-year-old bull he is very fluid in his travel and has excellent feet. Lot 19 should produce some excellent replacements.

Lot 21 exhibits his sires traits with above average thickness and depth along with a smooth made pattern. He has above average growth with a moderate birth weight. He doesn't display any ratios as we lost his dam and he was raised by a foster dam.

9104 the dam of lot 25, is a maternal granddaughter of our top selling Bonnebell 316 donor in last year's bull sale. Combining her genetics with Body Builder proves to be a good recipe for good performance. We believe that the daughters of this bull will defy what the EPDs read when it comes to Heifer Pregnancy and Stayability. We would keep the the replacements to build a very functional type of cow.

We flushed 3 of our donors to Body Builder. These donors were 10-12 years of age and hadn't missed a calving opportunity and had very good feet, udders and production records. Lot 27 is the result of a flush out of our 112 MPPA Redstone daughter.

Our replacement heifers bred to Wrangler raised some very nice calving ease sons on their first try out of the chute. Lot 47 combines that moderate birth weight with a plus 17 CED and then adds a 108 weaning ratio to round off a nice package.

48

2124, the dam of lot 50 produced the last Wrangler son in this years offering. Being last doesn't mean he is lacking anything other than the ability to be born earlier so he could have came in the sale earlier. He has some of the best performance ratios in this pen and is out of a first-calf heifer.

Money Talks x Admiral on the bottom side of the pedigree can combine to generate a cow with a 109 MPPA and that cow can produce a calf born the first part of April that can compete with calves much older. This combination with the 2223 sire on the top side makes for one of the top performance ratioing bulls. He is dark red with good depth and thickness and should produce daughters with excellent feet and udders.

Lot 65 is a deep bodied, strong topped bull that is attractive to look at. He was born a twin to another bull that was raised on a first-calf heifer so he doesn't receive any ratios. If you compare him to his contemporaries he is above average at both weaning and yearling measurements.

We don't make mating decisions based off of EPDs but when we cross Fusion 5202 with an Admiral daughter the result is some breed topping EPDs and Indicies. What is more important would be that the individual like Lot 72 actually performed well with his contemporary group and looked the part instead of having just good EPDs.

4354 is one of the highest weaning ratio bulls in the offering. He is a younger bull but has competed very well with herd mates much older. Given his pedigree he will add a little frame with his performance but will still bring problem free daughters to the replacement pen.

Lot 108 exhibits more thickness and depth than expected for his young age. In many sales he would have placed toward the upper third of the sale but with a small sire group and a later birth he ends up being the last bull for the sale.

RED ANGUS GUIDE TO EPDS

RedAngus.org

ProS..... Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

HB HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

GM..... GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

CED..... Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

BW Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

WW Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

YW Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

ADG..... Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

DMI Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

MILK Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

ME Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

HPG..... Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

CEM Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

STAY..... Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

MARB... Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

YG Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

CW Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

REA Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

FAT Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)

REDS RISING

Escalate Your Prosperity

Red Angus boosts profitability with docile temperaments, environmental resilience, premium carcass quality and exceptional maternal traits. Registrations have surged by 24% over the past decade, underscoring Red Angus' significance across all segments of the beef industry.

Ranch Philosophy

The cattle industry is constantly changing and feeders and packers seem to be the drivers in directing that change. Their ability to direct change is related to the concentration of ownership within these two segments of our industry. Both segments keep increasing the size of animal that they want to feed and harvest because of their efficiency of producing more pounds of beef per animal and reducing the costs by feeding and harvesting less head of cattle and leaving them within the feedlot for longer periods of time. What impacts their bottom line is diametrically opposed to what impacts the cow/calf producers bottom line.

In our segment of the industry, most cow/calf producers raise cattle in an environment that has limitations to what it can produce hindering our ability to meet the changes without increasing input feed costs to sustain the larger, higher output cattle that the feeders and packers are looking for. Coupled with this the feed input costs has increased dramatically over the past four years compounding the problems to reach profitability within our segment of the industry.

I am thankful that our Red Angus Association staff is working hard to educate the industry on the quality of Red Angus cattle and how they can reach all the requirements in the branded packer programs that have been set for Angus cattle. Through this effort, the USDA has recognized Red Angus as Angus so that they are able to qualify in all programs with the exception of CAB which is owned by the Angus Association. This education is going to take time to develop traction and will eventually open more marketing opportunities for our cattle. In the meantime, the industry is using excuses to discount red hided cattle so that they can add more profit to their segment of the industry. With the current cattle inventory, we are hopeful that the next three years will see above average feeder cattle demand which will diminish the ability for discounts because of hide color.

We continue striving to produce cattle that will be able to thrive in a grass-based environment without any inputs other than salt, mineral and some hay when needed due to drought or severe winter conditions. When you study the genetics that we are using you might ask, why don't you use higher growth sires to increase the weights of your calves? The answer lies in what we have discovered when we have attempted to do that very thing. Most sires that we have used to accomplish this, with exceptions of a few outliers, tend to produce females that have a higher percentage chance of failing to breed as yearlings or first-calf heifers because they have a higher energy requirement than what our natural environment can provide. That can become very expensive when you account for the time and dollars invested in developing those females to that stage.

The sires that we are using will still push the envelop of producing offspring with performance that is limited by our environment on any given year because our weaning weights can fluctuate 50-100 pounds based on when and how much rain falls from the sky. We continue to search the breed for the outliers that will push the performance as well as carcass traits but will not give up the fertility and longevity developed within the herd which are the key profit drivers for any cow-calf operation.
