

TIMBER LINE RANCH

**BRED FOR
BUSINESS**

Bull Sale

APRIL 15TH 2022
MANHATTAN, MONTANA

Fellow Cattlemen.

We are so excited to welcome you to our first live auction sale in 38 years. Our crop of bulls this year far surpasses all previous years and we are truly proud of the genetics we have to offer. With over 7 decades of experience in the Angus business we thought "Bred for Business" was only fitting.

We believe in a sharp knife; just the top 29% of this year's calf crop made it to the bull pen. We make sure to use herd bulls that give us a consistent calf crop, each as good as the next. This, along with 40 plus years of utilizing AI, has given us a unique opportunity to continually and consistently improve the quality of our cow herd. We work to improve weaning weights, while keeping birth weights in check both with no sacrifice to phenotype, soundness or foot quality. We strive to raise the type of well made, performance driven cattle that keep us and our customers in business.

This year we were happy to help Talyre Sitz with her masters project by having her foot score all the bulls. We were grateful for her help and jumped on the chance to have a third party validate these foot scores. You will find the offering EPD's have been genomically enhanced. Fertility testing and free delivery make these bulls ready to get to work for you.

We would like to extend a special thank you to Phil and the crew at the Veltkamp Feedlot for all their hardwork and detailed attention to our cattle. We have an incredible group of friends and neighbors and we sure owe a lot of our success to their unwavering support.

Thank you for taking time to look through our offering, we are humbled by your interest in our program. If you have any questions, or would like to come visit, please feel free to reach out.

- Jake Callantine & Family

"For All Your Bull Buying Needs"

Ron Frye Marketing believes that bull buying is an essential part of any cattle operation. The genetics purchased each year are the building blocks for future generations of your cow herd. We are proud to be a part of this private treaty and the influence they have on their customers' programs through the years. We would hope that our knowledge of this offering would be beneficial to your quest of building a superior cow calf operation.

We are available to talk with you anytime and answer any questions you have about the cattle or the program. We look forward to assisting you and learning about your program. Contact us for any of your bull buying needs. If you need help purchasing bull(s) we would be happy to assist you in any way possible.

Thank you for your interest. We look forward to hearing from you.

Sincerely,

Ron Frye

One of the most muscular and dimensional bulls in the set who is incredibly bold and true in the shape of his forerib opening up massive in behind his shoulder. He comes extra dimensional out through his hip and pin set with a fantastic turn in through his stifle from behind setting them down square and true at the ground. If you're looking for one to add muscle and mass this one needs to be studied.

Really smooth, correctly made bull that has an attractive front end with plenty of style and eye appeal. Really like the way that his shoulder lays into his body and the set to his knee allows for extra reach out of his front end. The bull has a tremendous amount of body and rib being deep in his heart and soft in his flank. Plus his tight sheath adds to eye appeal because he's strong topped and level hiped with a very smooth and correct muscle pattern. This bull has a lot of look and presence!

Tag 9 has as much performance, mass, and substance as any bull both visually and on paper. You have to appreciate this bull's genetic growth combined with the fact that he's a really good balanced, striking bull from the side that stops and gives a look of quality. He's massive ribbed and big muscled being extra square out his hip and it's worth noting his power from behind with how well he handles it on the move. This big testicled and tight sheathed bull is an impressive individual and a definite sale highlight. Ratioed 111 out of a first calf heifer.

This bull's added muscle shape only makes him more intriguing when you add it to his style and eye appeal. He has a lot of look and quality up front with how this bull attaches his neck correctly into the upper part of his shoulder, but comes back massive down his top and out through his hip. Really enjoy his shape of rib and the _ view from behind demonstrates how genuine and honest he is in his width and power. This tight sheathed bull has so many things to admire. He gained over 4lbs/day!

Without question the biggest bodied bull in the sale who is just tremendous in his forerib and depth of his heart. He's really soft centered with an awesome turn back into his flank and this bull will add some rib and flesh into his daughters. But, this big testicled bull is still wide and true from behind being genuine in his shape. He is easy to find in the pen with an overwhelming amount of mass and substance.

Might be as high quality of a bull as there is in the offering! This one is outstanding and does so many things to an incredibly high level! He's masculine and rugged without sacrificing style, eye appeal and balance from the side. He flows and transitions so well, having the right kind of rib and muscle pattern while offering a tremendous bold shape with added width and dimension. Definitely one of the sounder structured, better built bulls in the offering that is awesome in the way his shoulder is constructed with added the length of hip and flex in his hock. So high quality, he is a must set! Safe to use on heifers.

When 24 stops and poses up he has a lot of natural growth, performance, and dimension. Really like how long bodied and strong topped he is being long and level out his hip, with plenty of width and turn across his stifle. This bull's quality look in his front end enhances his balance from the side. He should add some mass and performance to his calf crop.

This bull has an absolutely incredible look whether he's stopped or on the move with so much presence! He is so high quality with a striking and eye catching look in his front end yet he comes back with a genuine beef bull shape being true in his forerib and incredibly wide and powerful down his top. Here is a more moderately framed bull that is big hipped and tight sheathed with lots of dimensional across his stifle. He's big testicled and takes a long athletic stride making him very intriguing. He's a quick find!

Real practical beef bull here that is smooth shouldered, deep sided and easy fleshing. He is built correctly off of both ends with the right angle to his shoulder and his knee and it is easy to like his smooth muscle pattern. His length of hip and correct tail head set draw intrigue to the fact he should be low maintenance and easy doing.

Tag 29 is incredibly good structured being fantastic on his feet and legs and so good in his angles. He takes as long and correct of a stride as any of them but then stops and strikes a pose that balances up exceptionally well. Love the way that his front end ties in high and correct being so strong in behind his shoulder and level of through his hip. This bull has more than enough rib and muscle to go along with it. So much quality from a balance and structural integrity standpoint, he is really a neat individual! He has gained over 4lbs/day.

Good solid bull here! Like his added rib and fleshing ability combined with a little extra moderation of frame. This deep heart and soft flanked bull should be one of the really low input easy keeping ones that holds his flesh well on cows. He's one of the softer muscled, smoother shouldered bulls that still gets out and tracks a long stride being level down his top and out his hip.

Fantastic herd bull prospect and an exceptionally high quality individual that is easy to find! So good balanced and eye catching right away but on top of that, he's fantastic in his shape from the _ view being bold in his forerib and massive topped with a square and stout pin set. The bull has a huge stifle and quarter and his quality just enhances in motion as he is so athletic and long striding. He is definitely one of the best ones who does so many things right, come study him! His dam is a young Spur daughter with a bright future.

Tremendous natural growth and performance in tag 58 who is deep sided, long bodied, and really soft centered with added fleshing ability. This bull has a low maintenance and practical look but should still add some pounds and performance into his calf crop. He's a smooth muscled bull that's long hipped with a ton of natural growth and mass. One of our favorite Paycheck calves with an impressive weaning ratio of 113.

The quality of tag 59 really begins at the surface where he is arguably the most athletic and soundest structured bull in the offering. He's a heads up and attractive fronted one that is really stylish in the way that his neck attaches to the upper part of his shoulder yet he doesn't sacrifice width or shape. This one is a neat individual who is so high quality in motion!

There isn't a bull with more substance and width than tag 61! He is incredible in the center part of his body because his forerib is awesome. He has a deep heart with a really fantastic turn to his flank. But this big testicled bull is so muscular and dimensional down his top being extra impressive from behind. It's extra impressive how wide and square he comes out his hip with a massive stifle and then he sets down true at the ground. If you want one to add power and product without making the cattle too big in their frame size this is a bull you will enjoy and appreciate. So much mass and product, backed by a powerful and attractive Final Answer daughter!

This bull offers a lot of quality! He's striking and eye catching through his front _ but has extra presence in the way he's shaped coming out of the backside of his shoulder. He is really genuine and true in his forerib taking a nice turn in his flank being extras stout and square coming out through his hip and he takes that all the way to the surface where he's wide and genuine. Tag 63 is a big testicled bull that handles himself correctly on the move with the the right angle of his shoulder and set to his knee allowing him to be flexible in his hock and pastern. He stops and strikes with as much quality and intrigue from the side as any of them!

Nice bull here with added moderation of frame, rib, and fleshing ability. He has a practical, low maintenance look with added depth of heart and turn back into his flank. He is tight sheathed and has more than enough width and substance to go along with it.

One of the younger bulls but tag 80 has gained over 4lbs/day and yet is absolutely fantastic from a structure standpoint. He's big and square in his foot and stout featured being without question the most athletic and best built bull in the sale. His shoulder is set in him right, his knee is correct and that allows him to be square up front. To go along with it, he's level and correct in his hip with flex and give to his hock and pastern. The way this smooth muscled and big ribbed bull ties all his quality together is exceptional and the recognize that he is backed by a killer good Felix (Upward) daughter that has raised 5 at 109, one of which was the 2020 high selling Prime Cut son to Hinman Angus, and you'll understand he certainly needs to be studied!

FULL BROTHER TO LOT 90

Really neat individual with some cool pieces! Like the way his neck attaches into his shoulder, the strength and width down his top being level hiped and set right in his tail. Tag 90 is really impressive in his rib shape and muscle pattern so this bull is easy to like on the profile.

There's little room for error in the cattle business. Producers need the most advanced information to make smart selection decisions, and Angus Genetics Inc. (AGI) provides it through genomic-enhanced expected progeny differences (GE-EPDs). EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

- Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs
- Better characterization of genetics for difficult-to-measure performance traits (such as carcass traits, maternal traits and feed efficiency)
- The ability to make more rapid progress for traits that are important to you, due to:
 - more accurate selection
 - easier identification of genetic outliers
 - the ability to propagate young animals with confidence earlier in their lives
